

Dear Residents, Families and Friends:

As we near the end of the first month of 2022, please accept this update on activities at Mount St. Mary this week:

1. Thank you for your support of our Visiting Program as we follow the public health directives. The Visitor Rapid Testing is going very well and I'm pleased to share that there have been only three visitor positive test results in the 22 days we have been conducting the testing. This tells us that visitors are not coming into visit when they have symptoms, and that good care and attention is being paid to our visitors protecting themselves.
2. The visiting restrictions are unchanged. We have on average 50 visitors a day.
3. The Outbreak in Cedar House will be lifted Saturday morning, January 29th at 9 am. Congratulations to the entire Mount St. Mary team, including our residents, visitors and staff in containing the outbreak and having it closed within the prescribed 10 days.
4. Visitors are reminded that proper mask wearing is required at all times while at Mount St. Mary.
5. Residents are reminded that no foodstuffs are permitted in residents rooms. This is part of our pest control program.

With best wishes and kind regards,  
Sara
